Course Description

Environmental policy development and implementation processes include developing and enacting legislation, regulation development and review, and implementation of new laws. California state processes is the central theme throughout the course, with international, federal, and local policy examples also provided. Business’ role in climate policy will be considered. Class assignments, lectures, and discussions with guest experts will cover policymaking theory, applied study, and practical skill building, such as writing for a policy audience.

Course Goals

- Understand the policymaking pipeline, from detecting a problem to writing and passing legislation to regulatory actions to implementation of a new law
- Explore key issues, players, and challenges in environmental policy
- Develop practical knowledge of cross-disciplinary strategies, public-private partnerships, and stakeholder engagement for sustainable policy change
- Improve analytical skills for interpreting information, compiling evidence, and writing for a policy audience

Readings, Responses, and Discussion Preparation

Designated readings are required to prepare students for in-class discussions and assignments. By 6:00pm the evening before select classes, students will post (1) a brief 100-150-word response to the required reading(s) and (2) at least two questions total for any guest speaker(s), as appropriate. Responses should be commentary or questions about the readings rather than a summary. They may be completed either individually or with your workshop team. Students are also expected to review speaker bios ahead of class.

Workshop Teams

Students will be assigned to workshop teams (3 students each) for group discussions, feedback, and other assignments.

Graded Assignments (with percentage weighted of final grade)

1. Select Readings – Students will be required to provide 100-150-word reading responses 24 hours before select classes. (10%)
2. Legislation Tracking Exercise – Students will review recent California-based environmental legislation and fill in a two-page form that leads the student through tracking the introduction, process, amendments, and outcomes of the bill and analysis, including how the final version differs from the initial version, why sections did or didn’t become law, and which stakeholders supported or opposed the bill. (10%)
3. Quizzes – Four quizzes throughout the quarter will assess working knowledge of the key topics discussed in class and readings. (15%)
4. Policy Memo - Engage with an advocacy organization that has a demonstrated interest in local, state, federal, or international policy. Students will be expected to participate in at least two meetings, events, or campaigns coordinated by the organization throughout the quarter and provide an original one-page Policy
Memo that provides context and the current status of an ongoing topic of choice, selected among topics addressed by the organization. (10%)  

5. **Informational Interview** – Students will coordinate an informational interview at least 25 minutes in duration with a policymaker, policy staff, think tank professional, science policy-relevant academic staff, advocacy organization staff, or other relevant professional (with instructor approval), to schedule an informational interview (in person, by phone/video call, or by email) to inform the Policy Pitch assignment. (5%)  

6. **Policy Pitch** – Students will propose a state- or local-level policy idea (no more than 350 words) to address a problem. The idea will eventually develop into a Policy Presentation and Policy Brief (the Final Paper). Students will also be expected to provide feedback on others’ policy pitches. (10%)  

7. **Policy Presentation** – Students will briefly present a policy proposal to an expert, with or without one or two presentation slides, field a question or two, and receive feedback. (2.5-min talk plus 1-min Q&A, 15%)  

8. **FINAL PAPER DUE 12/6 8:30pm: Policy Brief** – Based on the Policy Pitch idea, students will write a three-page Policy Brief for state legislators or local policymakers that provides relevant background and recommendations to address a particular problem. (3 pages, due Dec. 6 by 8:30pm, 25%)
